

One Million Barrels of Oil A Day From ANWR Is Equivalent To:

Raising CAFÉ standards to 39 miles per gallon for cars and 29 miles per gallon for light trucks

Energy generated by a 3.7-million-acre wind farm – the size of all of Connecticut and Rhode Island combined

Solar energy from a 448,000-acre solar panel – provided it was sunny continuously for an entire year

A fifth of America's domestic oil production by 2025

The amount of oil a day that went offline due to Hurricane Katrina
